

Datasheet: **AEROSignLED®**

**Original illuminated sign withstands all kinds of weather ...**

The **AEROSignLED®** has evolved over the years to be our most popular, traditional illuminated sign - and not without reason!

The 15 cm deep sign with its aerodynamic design is made from end to end with components and materials that will withstand even the harshest climate.

The **AEROSignLED®** has a high and even light output thanks to the efficient LED installation.

**Facts about the AEROSignLED®**

- Aerodynamic design and a depth of approx. 15 cm
- UV-resistant front plate of impact resistant polycarbonate, which does not yellow
- Weather resistant side parts. Moulded in high impact plastic
- Sturdy aluminium construction
- Low power consumption with 24-volt LED technology that connects to the vehicle without a transformer
- Maximum brightness and advertising value
- Simple installation - aluminium bracket as an add-on
- Sizes (HxW in cm): 30x105, 30x125, 30x140, 30x160, 40x125, 40x140 and 40x160

**24-volt LED technology** connects to the vehicle without a transformer.

Impact-resistant sides and front in UV-resistant polycarbonate. Result: The sign retains its appearance without yellowing.
