

Datasheet: **AEROSlimLED®**

A slim light board in aerodynamic design

With the **AEROSlimLED®** we have created a traditional illuminated sign in a sleek and modern design.

The **AEROSlimLED®** is only 78 mm deep, it is made of first-class materials and in an aerodynamic design.

The choice of materials means that the plate is impact-resistant and weatherproof. The sign is available in many standard sizes and as a special product in any length. The **AEROSlimLED®** is equipped with SRI Sign Solution's specially developed 24-volt technology.

Facts about AEROSlimLED®

- Modern look: Aerodynamic design and a depth of only 78 mm
- UV-resistant front: Weather resistant - will not fade/yellow
- Weather resistant side parts. Moulded in high impact plastic
- Silver anodised aluminium profile: Does not rust/retains an attractive surface
- Low power consumption with 24-volt LED technology that connects to the vehicle without a transformer
- Maximum brightness and advertising value
- Simple installation - aluminium bracket as an add-on
- Sizes (HxW in cm): 20x105, 20x125, 20x140, 30x105, 30x125, 30x140 and 30x160

24-volt LED technology

connects to the vehicle without a transformer.

AeroSlimLED® is suitable for mounting on a low or a high cab. The installation is very simple, as the plate has two recessed rails on the back, to which brackets can be attached.
