

Datasheet: **FRONTSignLED®**  **MADE IN DENMARK**

**A new generation of illuminated signs for trucks**

The **FRONTSignLED®** is the thinnest and most flexible illuminated sign on the market.

The sign is lit indirectly by efficient SMDs/LEDs. So the light output is extremely high and evenly distributed over the surface - even after many years.

The very low power consumption means that the **FRONTSignLED®** is an obvious and eco-friendly alternative to all other advertising signs on the market.

**Facts about FRONTSignLED®**

- Super-flexible and pliable illuminated sign with a plate thickness of only 8 mm
- Made from weather-resistant and long-lasting materials
- Very high light output from efficient SMDs/LEDs
- Low power consumption with 24-volt LED technology that connects to the vehicle without a transformer
- Optimum light distribution
- Low heat generation - giving many burning hours and long life  
Estimated number of burning hours: 50,000 hours
- Simple mounting by means of the enclosed fittings

 Original vehicle roof sign	 Ultra-thin and flexible	 High-performance LED diodes
 Protected against yellowing	 Maximum light output	 Many burning hours
 Frostproof materials	 Interference-suppressed	 Fast shipping and return
 Eco-friendly materials	 Registered trademark	 Design-protected

**24-volt LED technology** connects to the vehicle without a transformer.

We have fitted the sign with an aluminium bar, which effectively reduces the heat generation from the diodes. The result is more burning hours.
