

Datasheet: **AEROSpoilerLED®**

**MADE IN
DENMARK**

**An aerodynamic light sign
with maximum advertising
space**

With **AERO-SpoilerLED®**, we have created a traditional light sign with a sleek, modern look. Patented for its unique design, the sign is made from high-quality materials, ensuring it is both impact-resistant and weatherproof.

The sign is available in 2 sizes: 23 and 33 cm. The design allows you to utilise the entire front surface for text.

The **AERO-SpoilerLED®** is equipped with SRI Sign Solution's specially developed 24-volt technology.

Facts about AEROSpoilerLED®

- Modern look: Aerodynamic design and a depth of only 78 mm
- Design-protected
- 23 and 33-cm high signs with maximum advertising space
- UV-resistant front: Weather resistant - will not fade/yellow
- Weather resistant side parts. Moulded in high impact plastic.
- Silver anodised aluminium profile: Does not rust/retains an attractive surface
- Low power consumption with 24volt LED technology that connects to the vehicle without a transformer
- Simple installation - aluminium bracket as an add-on
- Sizes (HxW in cm): 23x105, 23x125, 23x140, 23x160, 33x105, 33x125, 33x140 og 33x160

24-volt LED technology
connects to the vehicle without a transformer.

AeroSpoilerLED® is suitable for mounting on a low or a high cab. The installation is very simple, as the plate has two recessed rails on the back, to which brackets can be attached.
